
what the model is shown at k=1 (true value 90, planted 100):

bare `line 10: n = y + z; n = 100`

full `line 10: n = y + z = 32 + 58; n = 100`

partial `line 10: n = y + z = ... + 58; n = 100`

'full' prints the operands 32 + 58 beside the planted 100; the sum 90 is not writt
